Unit 3, S12, SLO2 - DEQUE (Double-Ended Queue) - Insertion Operation

Fill in the Missing Programming Code: Insert at right of Double-Ended Queue

```
Answer: void insert_right() {
    int val;
    printf("\nEnter the value to be added:");
    scanf("%d", &val);
    if ((left == 0 && right == MAX - 1) || (left == right + 1)) {
        printf("\n OVERFLOW");
        return;
    }
    if (left == -1) {
        left = 0;
        right = 0;
    } else {
        if (right == MAX - 1)
            right = 0;
        else
            right = right + 1;
    }
    deque[right] = val;
}
```
