Unit 3, S13, SLO1 - DEQUE (Double-Ended Queue) - Deletion Operation

Fill in the Missing Programming Code: Delete at left of Double-Ended Queue

```
Answer: void delete_left() {
    if (left == -1) {
        printf("\n UNDERFLOW");
        return;
    }
    printf("\nThe deleted element is : %d", deque[left]);
    if (left == right) {
        left = -1;
        right = -1;
    } else {
        if (left == MAX - 1)
            left = 0;
        else
            left = left + 1;
    }
}
```

Fill in the Missing Programming Code: Delete at right of Double-Ended Queue

```
Answer: void delete_right() {
    if (left == -1) {
        printf("\n UNDERFLOW");
        return;
    }
    printf("\nThe element deleted is : %d", deque[right]);
    if (left == right) {
        left = -1;
        right = -1;
    } else {
        if (right == 0)
            right = MAX - 1;
        else
            right = right - 1;
    }
}
```
