Unit 3, S14, SLO2 - Deleting an Element from the Priority Queue

Fill in the Missing Programming Code for Priority Queue delete():

```
Answer: struct node *delete(struct node *start) {  
    struct node *ptr;  
    if (start == NULL) {  
        printf("\n UNDERFLOW");  
        return start;  
    } else {  
        ptr = start;  
        printf("\n Deleted item is: %d", ptr->data);  
        start = start->next;  
        free(ptr);  
    }  
    return start;  
}
```
